

# Nyrstar – Underground Mine Planning

## Myra Falls Mine, Campbell River, British Columbia

JDS has completed extensive underground mine planning for Nyrstar's Myra Falls operation located in British Columbia. Services provided to the client include on-site support and detailed long-term mine development planning and production scheduling. The focus of recent work was on capital expenditure analysis, evaluation of new access from surface, as well as options for increased production.

JDS performed all UG project management, engineering, and economic trade off studies.

**Project Value: \$500K**
